

# Sample pattern: Re-Lining Panties

This technique will both conceal hard-to-clean stains on older panties and prevent new panties from showing stains from **"you-know-when"**.

## 1

You will need about 1/4 yard of cotton knit fabric (**MUST BE KNIT**). 1/4 yard will line many pairs of panties (8-10 pairs).

It should be pre-washed and dried.

Best fabrics are brightly colored print or floral knits (not pastels or light solid colors - dark solids will work).

Panties can be any size, any outer fabric: nylon or cotton, new or old (but clean). You will put the new lining right on top of the old lining whether they are new or old.

Print out the template provided with this pattern.

## 2

Using the pattern template provided with this pattern, cut out the knit "patch".

The template has two sizes: Large and Small.

Large is used for adults and older teens, and small is used for younger teens and preteens.

3

Turn the knit patch upside down and the panties inside out. Flip the crotch of the panties over on top of the patch as shown.

The back of the panty liner is wider than the front. This is why the patch is shaped as it is.

Panties Inside Out

4

Center the crotch over the patch, then pin the corners from the PANTY side.

5

This photo shows where you will pivot when you are sewing.

6

You will use a zigzag stitch and stitch along the lines shown here. You'll stitch right along the seam line already on the panties and just inside the leg openings, leaving about 1/8" on the outside.

7

As you zigzag, to pivot, leave the needle down on the RIGHT side, lift the presser foot and turn 90 degrees.

8

Continue zigzagging until you have finished all 4 sides.

9

Stitching shown from the PATCH side.

**10**

Lift the patch and carefully trim **JUST** the patch fabric close to the edge of the stitching. Be careful not to **CUT** the panties or the stitching you just did.

**11**

After trimming ~ Finished!
